ABOUT ME

From the moment I produced a <H1>Hello</H1> using HTML tags, the web became interesting after dressing it with CSS, my eyes popped open, and once I created a "Hello World" on the console as my first web application, it left me curious on what else I was able to create as a Frontend Web Developer. Development work is just not a job, "in my opinion" it is an opportunity to truly challenge your limits and creativity and continue to improve your skillset by demonstrating high-quality products for your organization and the world.

EXPERIENCE

Independent Freelancer

01/2020 – Present

Working on client projects plus my personal side projects while looking for my next opportunity

Portfolio: <https://marcoframos.com> GitHub: <https://github.com/TheMarco77>

Tribute page

06/2018 – 06/2018

Based on the Portuguese Carnation Revolution in 1974, I decided to dedicate this tribute page project to recognize the freedom of Portugal and their colonization's
