Marco F. Ramos
Front-End Web Developer

Tampa, Florida

☎ (929) 266 - 3937

✉ mfilipeDev@gmail.com

ABOUT ME

From the moment I produced a <H1>Hello</H1> between the HTML tags, HTML just became interesting after dressing it with CSS, it popped my eyes open, and once I created the "Hello Wolf" on the browser's console as my first web application it left me curious on what else I was able to create as a Frontend Web Developer. In my eye's development work is just not a job, it is an opportunity to truly challenge your limits and creativity and continue to improve your skillset by demonstrating high-quality products to your organization and the world.

EXPERIENCE

Solar Escape Tanning | Eastchester, NY (Remote)   10/2011 – present
Web Developer / Webmaster Freelancer

• While developing, design, and building solarescapetanning.com and understanding the branding the immediate focus had to be divided into three parts 40% SEO, 35% sales, and 25% visual. The results were an average of 60% of returning and new customers, resulting in Solar Escape Tanning to open multiple locations.

• Manage and update the Solar Escape Tanning website, including all web pages, hosting, SEO, and build.
• Customize the WordPress template using HTML and CSS.
• Combined SEO on any new or edit requests by owners to their website.

Condor's House | Lima Peru (Remote)   11/2014 – 05/2015
Frontend Web Developer Consultant

• Worked on condorsHouse.com with management and owners on a new look (facelift) and creative ways for customers to be able to books rooms online, increasing their sales by 50%. Used mobile-first, and customized their template.

EDUCATION
